FIRE FIGHTING

As per guidelines provided by the IMO and flag state administrations, fire protection systems and appliances should be serviced, examined and tested periodically by an authorized facility acceptable by the ship's classification society.

It is imperative to ensure fire safety equipments are available for immediate use while the ship or offshore installation is in service.

■ PORTABLE & NON-PORTABLE FIRE EXTINGUISHERS

All types of portable & non-portable fire extinguishers, (foam, dry powder, CO2, Water, Fm200 etc.) are to be periodically serviced by a competent service company as per SOLAS regulation. Inspection, repair and hydro test services are available.

■ FIXED CO2 SYSTEMS

We offer complete inspection of CO2 fixed systems. Our service includes, level check of cylinders, release systems, distribution lines, manifold, main valve overhaul, alarms and functional testing.

■ FIXED FOAM SYSTEMS

Our service includes, foam sample laboratory analysis, inspection of foam monitors, branch pipes, foam tank, foam pumps, lines and nozzles, additionally renewing of all types of foam.

ClassNK

LIFERAFT

Every inflatable liferaft should be serviced at intervals 12 months at an approved service station, which is competent to service them, maintains proper servicing facilities and uses only properly trained and certified personnel.

■ INFLATION & PRESSURE TEST

Our service team conducting necessary valve pressure checks after inflating the liferaft at the service station.

■ SERVICE AS PER MANUFACTURER'S GUIDELINES

At our service stations, service and repair work are carried out only by qualified persons who have been trained and certified by liferaft manufacturers.

■ CONTAINER REPAIRS & PAINTING

Our FRP experts can repair most damages on liferaft containers at short notice and with quick turnaround time.

■ DL LIFERAFT SUSPENSION TEST

Our technicians conducting an overload suspension test on davitlaunched liferafts during its periodic servicing, as per manufacturer's guidelines.
